- 
- 1 **Stromal reprogramming and arterial Notch signaling inhibition drive TLS neogenesis during anti-angiogenic immunotherapy**  
S. Mahfoud<sup>1</sup>, J. Bernier-Latmani<sup>1</sup>, T. Wyss<sup>1</sup>, L. Bersier<sup>1</sup>, N. Chevalier<sup>1</sup>, N. O'Brien<sup>2</sup>, T. Pöschinger<sup>2</sup>, M. De Palma<sup>1</sup>, R. Bianchi<sup>3</sup>, T. V. Petrova<sup>1</sup>, Presenter: S. Mahfoud<sup>1</sup> (<sup>1</sup>Lausanne, <sup>2</sup>Penzberg, <sup>3</sup>Zurich)
- 
- 2 **Disruption of cerebrospinal fluid outflow and dynamics in ischemic stroke**  
S. Peymaei, G. Enzmann, A. Madarasz, T. Xiang, S. Proulx, B. Engelhardt, Presenter: S. Peymaei (Bern)
- 
- 3 **Dynamic Regulation of Actomyosin Tension within Junction-based Lamellipodia (JBL) Drives Endothelial Cell Rearrangements during Blood Vessel Morphogenesis.**  
L. Maggi, H. Belting, M. Affolter, J. Yin, K. Gundel, Presenter: L. Maggi (Basel)
